SUMMARY

Senior product manager specializing in **AI product management, UX, onboarding, growth, and conversion**. Took DreamCRM from **17% to 50% onboarding completion** and **57–60% month-1 retention** against a 20-30% B2B CRM benchmark.

EXPERIENCE

Senior Product Manager | *AI20 Labs*

May 2025 - Present

Lead PM across 3 AI products (DreamCRM, ZeroGPU, Unirac Solar) at an early-stage AI studio, reporting to and partnering directly with the CEO and founders.

- Reprioritized the DreamCRM roadmap against leadership pushback to ship an activation redesign over two competing AI features, taking **onboarding completion from 17% to 50%** and lifting **month-1 retention to 57-60%** against a 20-30% B2B CRM benchmark.
- Owned product strategy for ZeroGPU's Developer portal and Edge Operator portal (both built **0-to-1**), shaping a cloud-fallback architecture for unavailable edge devices and an accuracy-over-speed tradeoff for SLM/NLM workloads that helped close **pre-seed/seed** round.
- Led a cross-functional team of 5 engineers, 4 interns, and 1 marketer across 3 **AI products**, shipping 11+ features in 6 months, including 8 DreamCRM features, 2 ZeroGPU dashboards, and Unirac portal redesign delivered design-to-dev-ready in 1 month with multiple stakeholder reviews.
- Shipped **4 AI features** for DreamCRM (Gmail/LinkedIn Sync, AI-suggested actions, AI email drafting), driving **7m 41s average session length** and clearing **Google CASA Tier 2 OAuth** review for B2B sales eligibility.
- Led redesign of Unirac Solar's installer portal, collapsing a **22-step BOM workflow into 8 inputs** with live editable output and cutting installer interactions by **55%**.
- Led a **0-to-1 financial intelligence product** end-to-end as PM, taking it from concept to live in **4 months** by translating **UBPR and FRED datasets** into the metrics that matter for community and mid-size banks.
- Ran weekly discovery with **3 banking design partners** and guided engineering on **the financial data model** to ship a dashboard plus an **AI chatbot** that answers natural-language questions grounded in the bank's own data, now in active review with bank executives.

Product Manager | *Northeastern University, CAMD Research Lab*

June 2023 - May 2025

Led 0-to-1 launch of CAMD's public research platform, connecting Northeastern's design research output to industry collaborators and prospective students.

- Shipped a public research platform **end-to-end** through a US-Italy collaboration, driving **1,241+ downloads** and surfacing 4 research projects in the first 12 months.
- Drove **discovery** with 4 research leads to define IA and feature scope, then partnered with a designer and developer to ship a WCAG-compliant production platform.

Front End Developer | *Peapod Digital Labs (Ahold Delhaize)*

Jan 2022 - Jun 2022

Built customer-facing web features for Stop & Shop and Food Lion within Ahold Delhaize's US digital organization.

- Shipped customer-facing features for Stop & Shop and Food Lion (**300K+ combined daily visitors**), including Weekly Ads, Savings History, and search/discovery components that supported a **30% conversion lift** in A/B tests.

Product Manager | *Invica Infotech*

May 2019 - Nov 2020

- Defined and shipped a B2C Android design app from **0-to-1**, growing to **100K+ downloads** and a **4.5-star rating** with 4,710+ reviews on Google Play.
- Identified top funnel drop-offs through analytics and user feedback, cutting **release cycle time 20%** and improving 30-day retention.

SKILLS

LLM and GenAI Product Development, AI Product Evaluation, Prompt Engineering, Agentic AI workflows, Prototyping, RESTful APIs, A/B experimentation, PostHog, Amplitude, Mixpanel.

EDUCATION

M.S. Information Systems, Northeastern University

Jan 2021 – Apr 2023

B.E. Computer Science, Gujarat Technological University

Aug 2015 – May 2018
